| Thesis Title | A Proposed Device Driver for BIOS Ports Protection | | |
| Year | 7/1/2004 | | |
| Abstract | <p>The main process in the system is to construct the virtual device driver (VXD) which is resident in the main memory that monitor the computer ports. The protection of computer depends on protection mechanism of the Intel 80386 chip and later, that can be able to make the computer for preventing the access of malicious code to attack the computer.</p> | | |
