Department	Computer department		
Full Name as written in Passport	Amer Abdulmejeed Abdulrahman		
e-mail	amer6567@yahoo.com		
Career	<input type="radio"/> Assistant Lecturer	<input checked="" type="radio"/> Lecturer	<input type="radio"/> Assistant Professor
	<input checked="" type="radio"/> Master	<input type="radio"/> PhD	
Thesis Title	Proposed watermarking technique for distributed database transmission		
Year	2004		
Abstract	<p>In this work ,the watermark is mixed with the original data, and add the key to them. Encrypt this mixture by using hash, this will increase the security of the proposed system and protect it from any tamping. Wrapping the encrypted bits and blend them with error correcting codes of the original data to send them.</p> <p>After sending the data, it is possible to accomplish the authentication process by comparing between received data after extracting error-correcting code and received data after mixing it with watermark and the key. Finally , the authentication results as matching between the results. If the results are matching then the authentication is achieved.</p>
