Thesis Title	Variation in soils extending among the archeological tells and argubs in al-latifiyah project sw of Baghdad			
Year	2003			

Abstract

Soil at Al-latifiya project were chosen situated at the left side of Euphrates river between longitudes 44 15 to 44 34 and latitude 33 00 to 33 50. 195 archeological tells are abundant in this area with a wide net of argubs. The study depended on semi detailed soil survey map of 1:50000 scale at the series level . Three lines transects were chosen from north middle and south of the project represented the beginning and the terminal argubs and atels.
