Year	2011		
Abstract	<p>The research assume that urban system in governorate has been affected by external environment, due to religious dominate of KERBLA city. The result have shown , the primate pattern is common feature in the urban system owing to over urbanization of KERBLA city , which extremes the law of primate city that has been established by Jefferson. Calculation population potential has been shown , that within radius of 13 km of KERBLA city, live 82% of urban population in governorate. Thus ,core-periphery model that friedmann has firmed appears due to the reduction of interdependency between the cites in governorate.</p>
