Thesis Title	Semantic Search in guiding the healthy mind to the advantages of the Qur'an) to Abu Saud (d. 982 AH		
Year	2006		

## Abstract

Praise be to Allah, Lord of the Worlds, and prayers and peace be upon the conciseness of speech Envoy Otte mercy to sleep, and upon good pure, and his righteous companions, good guys, and after ...

Still Ttravd of determination, and the soul yearns to be given the flux of the Qur'an which is not aware of his secrets, nor limit the treasures of his greatness does not run out of miracles, pledging all the colors of the statement and clarification. This is the attitude of scientists and researchers to punish the ages and times, as sought them to interpret the words of the book Al-Hakim and Trakiph, and a statement as Gamad them, and stand on his secrets and signs Aajazh, analysis methods and detection Khvaya sense to derive legal rulings from it, was and will devour the are (meaning) which is the very language of science, and the main function of language, the strength of the semantics and the basis upon which to build, so the modern era were held in various semantic theories, have made her the center of meaning, as well as it seeks to define what it is.

The varied fields of semantics, according to the diversity of the sciences of language related voice and grammar and rhetoric, so they said significant voice, and significant morphological, and significance of grammatical, and so on, and this detective linguistic Results purpose of access to meaning is determined, which is the difficulty of the finest branches of linguistics and retake; Ansbabha to the study of Meaning. Meaning, then, is the link or the link between semantics and linguistics on the one hand, and between semantics and science of interpretation on the other. Envisaged by the scholars of Linguists and Nhoyen and Blagaan and fundamentalists and interpreters to learn the secrets of this language; language

Download Aziz. Was one of those unexplained Jalil least matter who was preceded by senior commentators, Abu Saud Mohammed bin Mohammed Al Emadi (d. 982 AH), as it had a capacity of knowledgeable and brief him, did not restrict his knowledge in a specific direction of trends in knowledge, and so it was able to undertake in the various sciences that I found the time, was a judge and a fundamentalist, and explaining and speaking, has shown that its effects left by, including the interpretation at hand, it's packed with issues of Semantic Search and diversity, and from that was the subject of research (Semantic Search in guiding a healthy mind to the advantages of the Qur'an] to my father Saud).

This research was built on the introduction and preface, three chapters, Mtheloh conclusion included the most important findings of the research. In the introduction to the importance of the topic presented and the reason for his choice. The boot came under the title (Abu-Soud and his approach and the concept of significance). Has been made in Mbgesan, I spoke in the first two of (the author and interpreted), offered a profile about the life of Abu Saud and his doctrine of jurisprudence, and the elderly, culture and prestige of scientific, and his works and his death, and then put a closer interpretation and time-authored, and the reason for writing, and the methodology of Abu Saud in the interpretation and its resources it. And dealt with in the second section of the boot (the concept of significance to the ancient and modern, and the Abu Saud) attempt to bring the concept of significance to the owner of this interpretation by showing some of the concepts Results have, namely, (the situation, and the relationship between the signifier and the signified, and the elements of the triangle semantic).

The first chapter, it has allocated (b significant voice and morphological), and was in Mbgesan, dealt with in the first two (significance voice), has included two parts; one significant voice steady, having examined the replacement voice pointing out some of the concepts sound associated with the phenomenon of substitution towards audio language from the silent and Saút, and section sound and Alfonim, then talked about the replacement voice between Alsoamt and replace the audio between the vowels and the impact of this change in meaning, and then touched upon the features of audio included (Naber and toning), I studied toning kind of detail otherwise Naber, which limited the definition it; due to lack of exposure that Abu Saud him. The other division of the significance of sound, it is meaningful voice is steady, has offered it for a sign suggestive of the votes of the ancients, and the Abu Soud, and headed for the second topic to study (significant morphological), has been made in two sections, singled out the first two (b indication of the names) which included three axes are: derivatives of (name of an actor, and the form of exaggeration, and the name of the effect, likening the recipe), and rotation in the formulas, and the significance of the crowd. The other part of this thesis Fajts (b semantics acts), and confined to the Almazidh with the letter or two or three without the naked; referred to Abu Saud, and his attention to the significance of this action.

And studied in Chapter II (significant language) came on four Detectives, take the first of which phenomena (subscription verbal and contrast), and stop the second when the phenomenon (synonymy and differences semantic) between words, while the third studied (concordance semantic) between the words and structures, while the allocated topic the fourth study (semantic change), and discussed the three images of a semantic change, which was the focus of attention of Abu Saud, the first semantic customization. Second, semantic generalization. Third, the change in the area of significance; which the Abu Soud four forms, namely: (transition from significant sensory to denote sensual again, and the transition from significant sensory to denote moral, and the transition from significant moral to signify sensuality, and the transition from significant moral to denote moral other .)

And discussed in Chapter III (grammatical significance), and four Detectives. Studied at the beginning: (letters denote meanings), including: prepositions, and the characters sympathetic. The second was made for (single sign), which included the definition and sign indefinite, and sign in to drop the word to express aspects of lifting, fraud, or traction, and dealt with in the third section (indication of sentence), has touched Abu Saud into three types:

(Nominal and actual, and police), and examined it also an indication of the change in the structure of sentence of three symptoms are: (sign of the deletion, and the significance of the presentation and the delay, and the significance of class and interface), have shown the position of Abu Saud of these changes in the wholesale attempt detected by alert implications for Abu Saud, and was fourth in the topic (sign methods) included Dalalta my style news, and construction of both types: Tlbe, and Tlbe. And included the first of them: the sign of command method, and prohibitions, and the question, and the appeal, while it is not Tlbe encompassing a significant way of exclamation, and the significance of style praise and slander, and the significance of (perhaps). He touched on this topic is also my style to denote emphasis, and for being the palace of meanings within the method of breaking news.
